Congratulations with your new Hama Beads!

You can now create your own designs or you can follow the instructions either on this packing or in one of our Inspiration books. Place the beads on the pegboard until you have created the design you want. You can keep moving the beads until they have been ironed. Once ironed, the beads cannot be used again. If you are careful when ironing, the pegboard can be used over and over again.

Hama Beads are available in three sizes and we recommend that they are ironed at the following temperatures:

Mini beads: Set the iron to the wool setting.  = ..

Midi beads: Set the iron to the cotton setting.  = ..

Maxi beads: Set the iron to the linen setting.  = ...

Place an ironing paper on the pegboard with the beads.
Use a Hama ironing paper for a good result.

Always remember to have an adult do the ironing for you, as both the iron and the bead design get very hot.

The exact temperature may vary from iron to iron. Therefore it is a good idea first to make a test ironing of a small bead design. Apply the iron to the ironing paper for just a few seconds using smooth, circular movements. Never hold the iron completely still. After having applied the iron for a short period, the colour of the beads will suddenly be more clearly visible through the ironing paper; this means that the ironing is finished. Carefully remove the ironing paper, but leave the ironed design to cool for a couple of minutes without removing it from the pegboard. If necessary, repeat the ironing with the ironing paper still placed on the pegboard. Carefully remove the cooled design from the pegboard. You will get the best result, if you press it under e.g. a book until it is completely cooled off.

Have fun with your Hama Beads!

You will have many wonderful hours with Hama. Fantasy is the only limit to your designs! If you have Internet access, come visit our homepage: www.hama.dk

Yours faithfully
Malte Haaning Plastic A/S
... made in Denmark

**Not suitable for children under the age of 3.
Contains small parts - choking hazard.
Keep the address for future reference.**
